

# Paediatric Acute Illness Management

The Paediatric Acute Illness Management course is aimed at nurses and foundation doctors working in any clinical environment where they come in to contact with children at risk of deteriorating illness.

This one day course is a blend of lectures, workshops and simulated learning which embeds the ABCDE approach to assessment and management of acutely ill children who are at risk of deterioration.

Prior to the course the candidates are provided with a comprehensive manual which provides underpinning knowledge to support the day and on-going learning.

The course prepares candidates to undertake an MCQ and simulated scenario assessment at the end of the day.
