Group and Programme Ranking/Allocation Process

LNR Foundation School uses a 1-Stage Process for Preferencing (Programme only). Trent Foundation School uses a 2-Stage Process for Preferencing (Group and Programme).

The UKFPO will be undertaking this process on behalf of East Midlands Foundation Schools. For further information on how the Allocation process works please refer to the 'UK Foundation Programme Office Applicants' Handbook' at the following link <https://foundationprogramme.nhs.uk/>

Failure to rank your programme groups or programme preferences by the deadline will result in you being randomly allocated to a programme group/programme. Late preferences cannot be considered under any circumstances, so please ensure you give yourself sufficient time to complete these stages.

We advise you to rank all available programmes in order of preference. If you do not rank any or sufficient programme groups or programmes then the algorithm will match you randomly.

Are there any hospital sites that are more popular than others?

No - the schools do not hold data about which programmes or training locations are the most popular. Many applicants will take into consideration their geographical base within the region and/or their future career ambitions when ranking the available programmes. Our Foundation School brochures contain a series of trainee testimonials which you may find informative:
